

RIO Compliant Service T&Cs

(the "Service T&Cs")

1 Subject

These Service T&Cs constitute a stand-alone agreement between TB Digital Services GmbH ("TBDS") and its user ("the user"). The Service T&Cs regulate the provision of the service described in section 2 by TBDS to the user ("the TBDS services") through the platform. They constitute a stand-alone agreement in addition to the Platform T&Cs already concluded between the user and TBDS. Unless otherwise expressly stipulated in these Service T&Cs, the provisions of the Platform T&Cs already concluded between the user and TBDS shall apply to these Service T&Cs. The terms defined in the Platform T&Cs shall also apply to these Service T&Cs. The Service T&Cs are agreed via the platform in accordance with the provisions in sections 2.1 and 2.3 of the Platform T&Cs.

2 TBDS Service

2.1 TBDS shall provide the following TBDS service to the user specified in the service specification during the term of these Service T&Cs:

Designation	Short description
RIO Compliant	RIO Compliant ensures that the user is able to download, archive and export tachograph and Driver Card data from the vehicle.

The RIO Compliant service is available for vehicles fitted with a RIO Box as well as for vehicles fitted with an on-board Telematics Board Module 2 (TBM2). The respective service specification is applicable depending on whether the vehicle is fitted with a RIO Box or a TBM2.

The latest version of the detailed service specification (for the RIO Box and TBM2 respectively), in addition to the technical requirements and fee payable for using the service, can also be viewed on the platform at <https://rio.cloud>.

Important note: The remote download functionality for vehicles with TBM2 is implemented through the T-Systems platform (product name: Logiweb/MAN TeleMatics) and the MAN TeleMatics Client (application/user interface to be installed by customers). Please also refer to the "Technical requirements" section of this RIO Compliant for TBM2 service specification.

2.2 The availability of the platform for the aforementioned service to be provided via it shall be based on section 3.2 of the Platform T&Cs. Contrary to section 3.2 of the Platform T&Cs, availability for the present service is 98% for vehicles with TBM2..

2.3 The following provisions are added to the order data processing agreed under the Platform T&Cs for the purposes of these Service T&Cs:

2.4 In compliance with EU Regulation 165/2014 of the European Parliament and the Council, the service incorporates the responsibility of transport companies to store data read from the digital tachograph and the Driver Card for a minimum of one year and to delete it at the appropriate time.

The TBM2 transmits the data to the T-Systems platform (product description: Logiweb/MAN TeleMatics). The T-Systems platform forwards this vehicle information on to the RIO platform. For this purpose, a portion of the data must also be stored and processed on the T-Systems platform.

3 Fee

3.1 The fee payable for the TBDS service shall be based on the rates listed on the platform at <https://rio.cloud>, and is subject to statutory value-added tax (VAT). The fee shall be based on the number of vehicles registered for the service by the user. On being registered by the user, the vehicle shall be covered by the service, and the service provision shall be charged on a daily basis. For months in which the TBDS service was contracted for only a portion of the month, the fee shall be charged pro rata temporis.

3.2 On receipt of invoice from TBDS, the user shall make payment to TBDS's payment service provider as specified in section 4.2 of the Platform T&Cs. This payment shall fulfil the user's obligation to TBDS.

3.3 If the user is in default despite previous appropriate written warnings from TBDS, TBDS may, after giving further advance notice of at least one (1) week, suspend its provision of the TBDS service under these Service T&Cs until payment is received.

4 Amendments

4.1 Amendments to the Service T&Cs shall require the agreement of both parties, unless otherwise stipulated in section 4.

4.2 As part of its provision of the TBDS service, TBDS may make appropriate technical modifications, particularly to the extent that these are necessary to improve functionality or comply with legal requirements.

4.3 The user shall be notified in writing of reasonable changes to the services and appropriate price increases as part of the provision of the TBDS service, and shall be given the chance to object to any change within six (6) weeks. If no objection is made (in writing or by e-mail) to a reasonable change to a service/price increase within that six (6) week period, the change to the service/price increase shall be deemed to have been accepted, provided the user was made aware of this legal consequence when it was notified of the change. If the user objects to a change to the service or increase in fees, TBDS shall be entitled to immediately terminate the service provision to the user under the terms of the Service T&Cs. Furthermore, the user shall be entitled to effect ordinary termination of the Service T&Cs at any time.

5 Warranty and liability

5.1 Warranty

5.1.1 The user shall inform TBDS immediately of any defect in the TBDS service. TBDS shall rectify any defects in the TBDS service within a reasonable period of time. Should TBDS fail to rectify a defect within a reasonable period of time on two (2) occasions, the user shall be entitled to effect extraordinary termination of these Service T&Cs.

Other claims by the user shall be governed in accordance with section 5.2.

5.1.2 Claims for defects shall be excluded where the cause lies with the user or one of its agents in performance.

5.2 Liability

TBDS shall be liable for loss or damage that is attributable to intentional acts and/or gross negligence on the part of TBDS or its agents in performance. TBDS shall only be liable for loss or damage resulting from ordinary negligence on the part of TBDS or its agents in performance if a cardinal obligation has been breached. Cardinal obligations are essential contractual obligations that ensure due implementation of the contract, observance of which the user relied upon, and was entitled to do so.

In the event of a breach of these cardinal obligations caused by ordinary negligence, TBDS's liability shall be limited to typically foreseeable loss or damage, though limited to a maximum of 100% of the annual fee.

Otherwise, TBDS's liability for ordinary negligence shall be excluded.

5.3 Other exclusions

5.3.1 TBDS shall not be liable for the proper condition of vehicles belonging to the user for which the TBDS service is being provided. The TBDS service is merely intended to provide support to the user; responsibility for complying with legislation and for the use and condition of the vehicles shall remain with the owner or driver as appropriate.

5.3.2 TBDS shall not be liable for the fulfilment/fulfilability of the user's obligations to regulatory bodies in relation to the provision of tachograph and driver card data. The user's legal obligations in this regard shall not be assumed by TBDS.

5.3.3 The provision of RIO boxes and/or RIO transmitter units and/or TBM2 shall not form an integral part of these Service T&Cs. No warranty shall be provided and no liability accepted under the terms of these Service T&Cs in this regard.

5.3.4 Likewise, no warranty shall be provided and/or no liability assumed under the terms of these Service T&Cs for defective TBDS services (particularly for missing or incorrect data) and/or for

damages resulting from malfunctions and/or breakdowns of vehicles, of RIO Boxes, RIO transmitter units and/or TBM2, and/or from incorrect data input by the user.

6 Term and termination

6.1 Term

These Service T&Cs are concluded for an indefinite period.

6.2 Termination

6.2.1 The user shall be entitled to effect ordinary termination of these Service T&Cs at any time without giving advance notice to TBDS. The user may also terminate these Service T&Cs by simply deactivating the service on the platform. After any such deactivation, reactivating the service shall take a minimum of four (4) working days. **Important note: Once RIO Compliant for TBM2 has been deactivated, it is no longer possible to reactivate RIO Compliant or MAN TeleMatics for the same vehicle .**

6.2.2 TBDS shall be entitled to effect ordinary termination of the Service T&Cs, subject to a notice period of three (3) months to the end of any month.

6.2.3 The right to termination for cause remains unaffected for both parties.

6.2.4 Termination of these Service T&Cs, for whatever reason, shall not affect the Platform T&Cs or any other T&Cs agreed in relation to other services. However, if the Platform T&Cs are terminated, for whatever reason, these Service T&Cs shall also come to an end at the same time.

6.2.5 The provision of the TBDS service under these Service T&Cs for customers with an on-board TBM2 is dependent on the conclusion and continued applicability of the following other Service T&Cs (with TBDS or third-party providers): MAN Bridge. If the said other Service T&Cs are terminated for whatever reason, these Service T&Cs shall also come to an end at the same time. Important note: This applies only to customers with a TBM2 installed on-board.

6.2.6 The provision of the following other TBDS services and/or third-party services are dependent on the conclusion and continued applicability of these Service T&Cs: [None]. If these Service T&Cs are terminated for whatever reason, the other TBDS services and/or third-party services and any other related Service T&Cs concluded shall come to an end at the same time.

7 Miscellaneous

7.1 The "Other provisions" set out in section 11 of the Platform T&Cs shall apply.

7.2 The user shall not be entitled to transfer rights and/or obligations under these Service T&Cs, either in whole or in part, to third parties without the prior written consent of TBDS.

LOGISTIK IM FLUSS.
